

Overview of Whole System

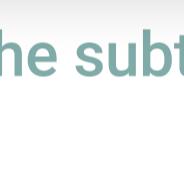

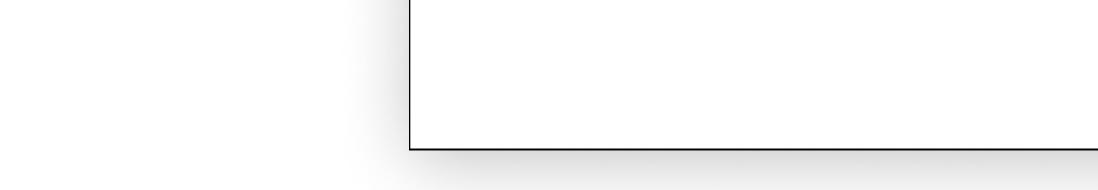

- ① Record your video or audio with your device

- ② Upload Your video/audio to our web app

- ③ Speech Recognition will convert all the audio part to extract english subtitles. It will also identify all the mispronunciations you made, or text out of order.

Pedant is a web application providing its services to regain control over your audio and video gestures. Whether it's minding your pronunciation or adding dialogs you forgot, we have got you covered.

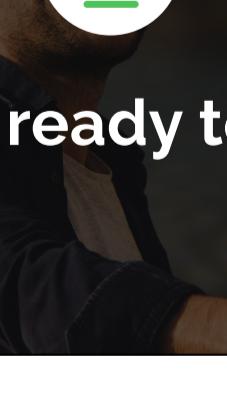

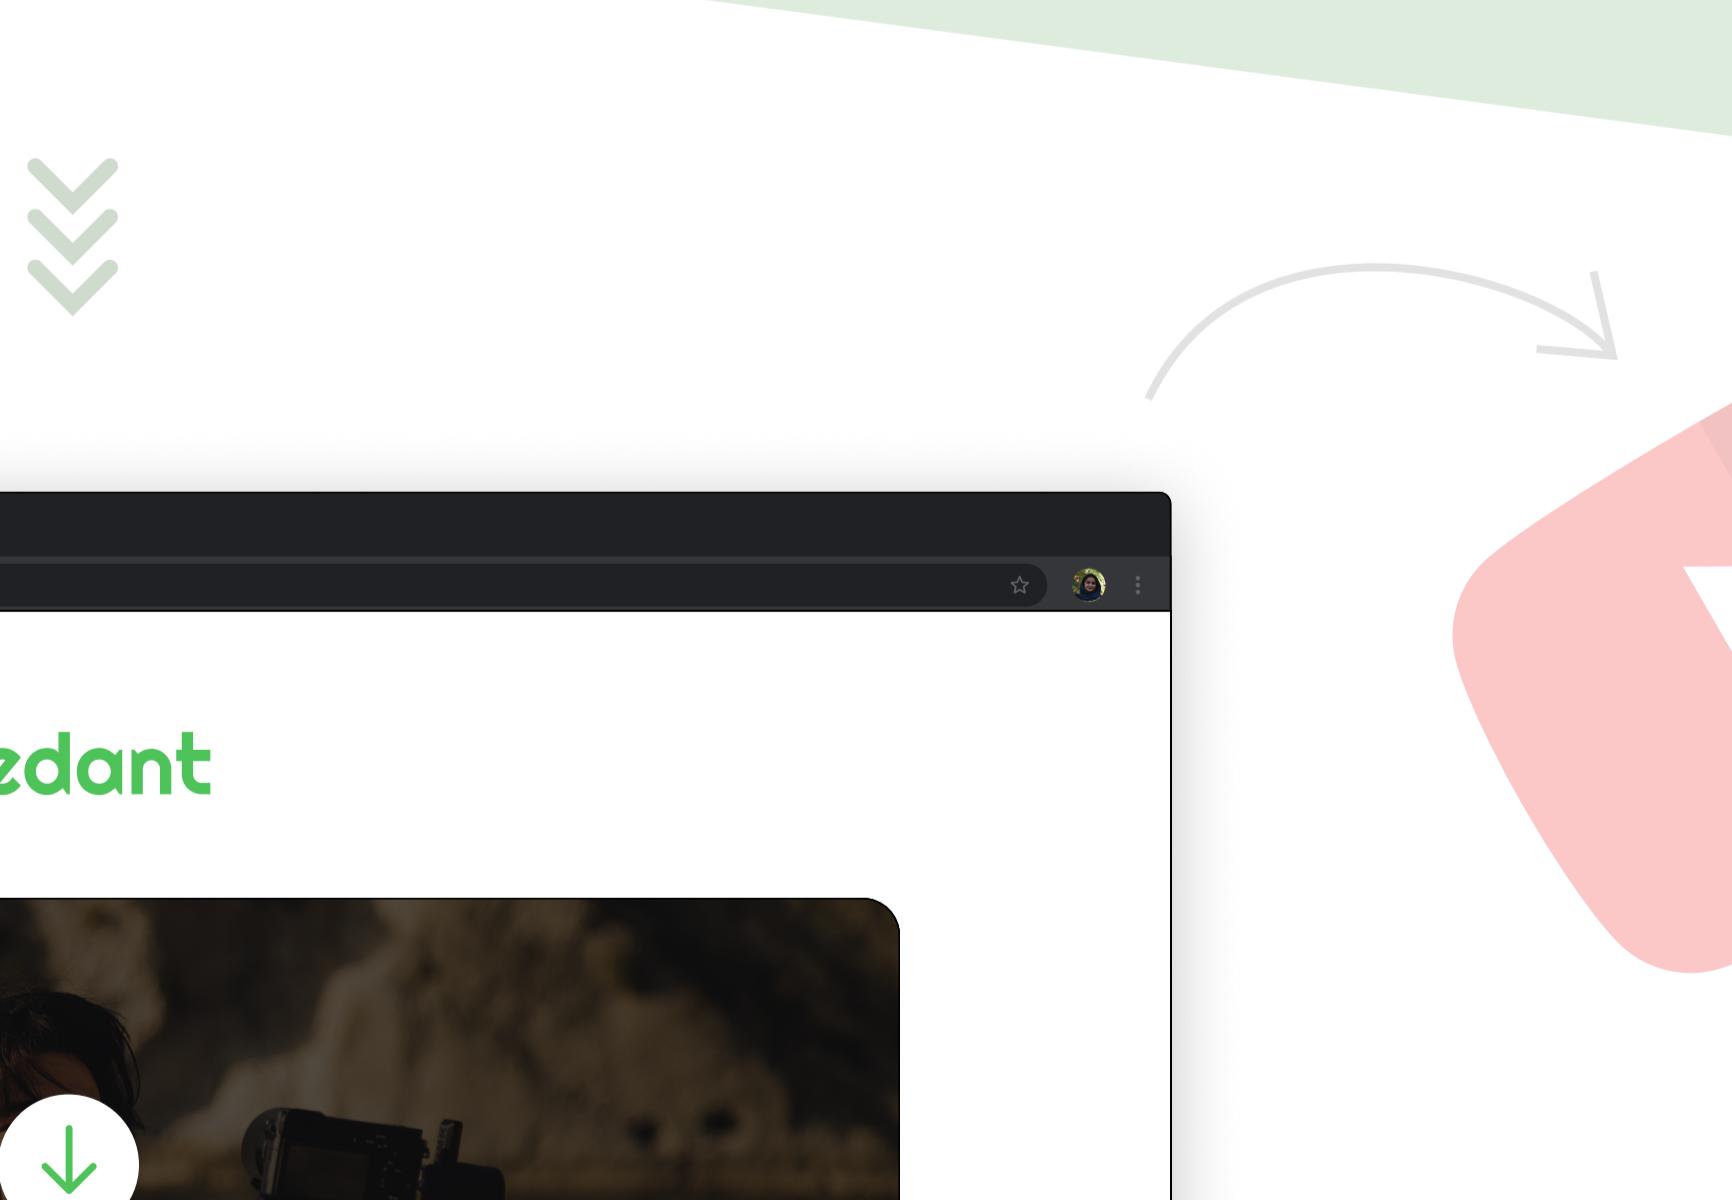

- ④ Edit what you don't like about the subtitles or add your new sentences.

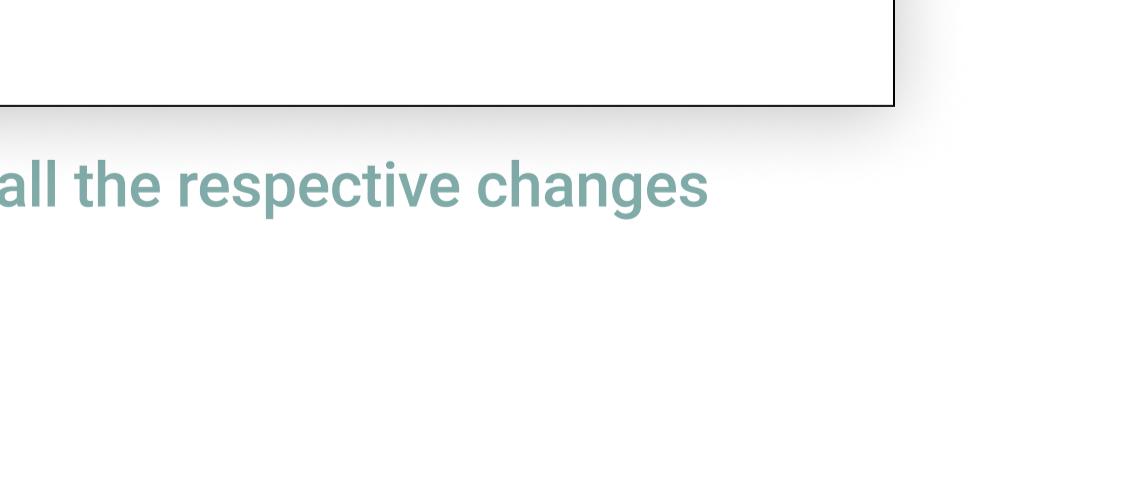

- ⑤ Text-to-speech algorithms will tune your audio with respect to your changes.

Pedant is a web application providing its services to regain control over your audio and video gestures. We do it with deepfake and text-to-speech technologies. Whether it's minding your pronunciation or adding dialogs you forgot, we have got you covered.

- ⑥ Deepfake algorithms will try to mind your expressions as well as lip syncs with respect to your changes.

Pedant is a web application providing its services to regain control over your audio and video gestures. We do it with deepfake and text-to-speech technologies. Whether it's minding your pronunciation or adding dialogs you forgot, we have got you covered.

- ⑦ Video/audio will be ready to download with all the respective changes
